

UHI Peer Training

The Integrated HIV/HTN **UHI PEER TRAINING**

On April 29, 2022, the Uganda Heart Institute sponsored a peer training as part of the Integrated HIV/HTN Project in Mbarara. The training focused on teaching peers how to measure blood pressure and recording blood pressure measurements.

Peers had the chance to have hands-on experience obtaining and recording blood pressure measurements. Their hands-on training was supervised by our excellent trainers, including Uganda Heart Institute representatives Dr. Emmy Okello and Ms. Elizabeth Arinatwe.

THE INTEGRATED HIV/HTN PROJECT PEER TRAINING

As trainers like Dr. Mucunguzi Atukunda demonstrated how blood pressure is monitored, different health institutions were able to report how they were performing in relation to the Integrated HIV/HTN initiative.

T R A I

N I N G

The hypertension practical session for blood pressure measurement and recording was extremely hands on and quiet the experience for peers, but so was getting an insight into the integration of hypertension into HIV treatment services, which was also guided by Dr. Mucunguzi.
